

INTRAVASCULAR ULTRASOUND (IVUS)

Course Director:

Dr. D. S. Chadha

MD (Int Med) DNB (Int Med) DM (Card)
FACC FSCAI
Manipal hospital, Bengaluru

Hands-on training at **state-of-the-art** experimental labs
with advanced **simulation software**

Duration :
1.5 Days

Timings :
Day 1- 8:30 AM – 5:30 PM
Day 2- 8:30 AM – 1:30 PM

Intravascular Ultrasound (IVUS)

The objective of the course is to understand the use of IVUS imaging to characterize lesion morphology, quantify plaque burden, guide stent sizing, and identify procedural complications. It covers the basics of IVUS & its application in complex subsets of Percutaneous coronary artery intervention.

Course Highlights

Training on IVUS with case-based practical approach

Practical tips sharing on the imaging and analysis of IVUS data for the Cath Lab to make more informed decisions

Providing comprehensive instruction with in-depth debate and teach-back sessions

Course Content

Day 1

- Fundamentals and Principles of IVUS
- Basic of IVUS Image Interpretation Normal vs diseased artery
- Imaging Measurements & Analysis Cross Sectional Area
- How to optimize PCI with IVUS post stenting Stent
- Expansion and its significance
- SOP for using IVUS

- Polaris Overview
- Disposables Overview
- Preparation of IVUS catheter
- Hands-on training on the iLab imaging system
- Role of IVUS in Complex PCI

Day 2

- Case studies – IVUS image interpretation
