

CARDIAC COMPUTER TOMOGRAPHY

Course Director:

Dr. Uday Jadhav

MD FACC(USA), FESC(EUROPE), FACP(USA),
FASH(USA), FCAPSC, FICC, FIAE, FISE, FCSI, FICP
Consultant Cardiologist, MGM New Bombay Hospital

Hands-on training at **state-of-the-art** experimental labs
with advanced **simulation software**

Duration : | Timings :
02 Days | 8:30 AM – 5:00 PM

Cardiac Computer Tomography (CT)

The objective of the course is to understand the basic principles of Computer Tomography requirements of Cardiac imaging providing an excellent anatomic assessment of coronary arteries having direct implications on patient management

Course Highlights

Introduction to CT physics and instrumentation

Proctored step-by-step analysis of real-life Cardiac CT studies

Technical aspects of performing CT coronary angiography with mentored hands-on scan reading and image interpretation

Course Content

Day 1: Lab Session

- Introduction to physics, instrumentation; Technical aspects of Cardiac CT acquisition
- Clinical indications and limitations
- Practical difficulties in arrhythmia/ high HR
- Post processing tools; Artifacts
- Radiation dose

Hands-on Practice

- CTCA Analysis - (MIP/MPR/VRT); Calcium score; Curved MPR of every vessel

Day 2: Lab Session

- Post PTCA cardiac CT • CABG graft evaluation

Hands-on Practice

- CTCA analysis (Normal anatomy/ anomalies); Stenosis assessment; Evaluation of plaque morphology; Myocardium and other cardiac structures; Post CABG graft evaluation; Coronary stents
