

TRANS ESOPHAGEAL ECHO- CARDIOGRAPHY

Course Director:

Dr. Manish Bansal

MD DNB (Card) Fellowship Cardiac Imaging
Senior Director – Clinical & Preventive Cardiology,
Medanta Heart Institute

Hands-on training at **state-of-the-art** experimental labs
with advanced **simulation software**

Duration : | Timings :
02 Days | 8:30 AM – 6:30 PM

Trans Esophageal Echocardiography

This course provides structured, simulation-based training to help specialists master TEE probe manipulation and 3D anatomical orientation. It aims to build the technical confidence needed to independently acquire images and guide real-time clinical decisions in high-pressure procedural settings.

Course Highlights

High-fidelity mannequin-based TEE simulation in an immersive lab environment

Extensive hands-on practice with close faculty supervision & plenty of time for one-on-one faculty interaction

Emphasis on probe control, orientation, and reproducible image acquisition

Focused training for structural heart disease and procedural guidance

Practical insights applicable to the operating room, catheterisation laboratory, and ICU
